

Ground Sprays Inward Spray Ring

The Inward Spray Ring is a ground spray element that emits twenty two (22) streams of water inward from a 6ft diameter ring. The feature flow rates can be adjusted to increase or decrease the spray height and projection of the streams. The Inward Spray Ring is designed for wet deck applications with no standing water. Users can work together to plug holes and create larger water flow through the unplugged holes.

Material Options:	PVC
Dimensions:	6' 0" x 5' 0" (1,83 m x 1,52 m)
Splash Zone:	10' 0" Dia. (3,05 m Dia.)
Standard Flow Rate:	25 to 220 GPM 94.63 to 832.79 LPM
PSI:	6
